

Daniel Vayman

St. Louis, MO/Dallas, TX | (314) 724-9560 | daniel@vayman.co
<https://www.vayman.co/>

EDUCATION

The University of Texas at Dallas

Expected Graduation Date: Spring 2025

B.S., Computer Science

GPA: 3.62

- **Notable Coursework:** Artificial Intelligence, Advanced Algorithm Design & Analysis, Programming Language Paradigms, Computer Networks, Operating Systems, Software Engineering, Data Structures and Algorithms, Digital Logic

SKILLS

- **Programming:** C, C++, C#, Java, Python, HTML, CSS, JS, Bash/Shell, XML, MIPS, SQL
- **Frameworks:** TensorFlow, PyTorch, ROS, Docker, CMake, Bazel, PyTest, REST API, RTOS
- **Networking/Hardware:** GPS/GNSS, LiDAR, Radar, IMU, Encoders, Motors, Cameras, PID, CAN, Ethernet, TCP/IP, UDP, IoT
- **Software:** Linux, MacOS, Windows, Git, VSCode, Microsoft Applications, Atlassian, Arduino

PROFESSIONAL EXPERIENCE

SpaceX

Hawthorne, CA

Software Engineering Intern

May 2024 - Aug. 2024

- Implemented **guidance, navigation, and control flight software** for a nonlinear attitude control system, working with **state machine logic** in C++ and Python, and ensuring reliability with rigorous unit testing.
- Drove a **cross-functional effort with hardware teams** to cut several hours from vehicle operations.
- Debugged fluid models in **internal simulation software**, and introduced new **application software** tools for sensor taring.
- Observed the **highest industry standards** of software design, testing, review, and verification practices.

Cisco

Research Triangle Park, NC

Software Engineering Intern

May 2023 - Aug. 2023

- Implemented hardware counter configuration on Cisco Firepower devices using C, C++, XML, & IPC, **significantly reducing debugging time** and introducing interface insights for enhanced network monitoring and security measures.
- Spearheaded the enhancement of Cisco ASA CLI by enabling port-channel/LACP management commands using C, **expanding and improving network monitoring and troubleshooting capabilities**.

TECHNICAL EXPERIENCE

Nova <https://nova-utd.github.io/>

The University of Texas at Dallas, Richardson, TX

Project Lead

Sep. 2022 - Current

- **Lead UT Dallas's autonomous driving research program** to achieve Level 4 full autonomous driving, managing teams of **12** software developers and **7** hardware technicians, outlining goals, delegating tasks, and fostering individual growth.
- **Oversee all aspects of our software, embedded, hardware, and control systems** design, development, integration, and deployment, while ensuring efficiency and adherence to safety measures and proper agile development methodology.
- Collaborate with team members to design and integrate critical algorithmic/engineering solutions, provide technical direction, review code, and deliver constructive feedback.

FIRST Robotics

Marquette High School, Chesterfield, MO

Co-Captain, Programming Lead, Design Lead

Aug. 2019 - May. 2022

- Single-handedly oversaw the development and testing of **computer vision** and **state estimation** algorithms in **Java** using **Tensorflow/Vuforia**, responsible for successful **embedded software deployment** and **sensor calibration**.
- Recruited, mentored, and managed a team of **20 students**, delegating responsibilities and fostering collaboration.

PROJECT EXPERIENCE

Navigator <https://nova-utd.github.io/navigator/>

Sep. 2022 - Current

- Lead and contribute to the development of the **first open-source, modular, extensive framework** for autonomous driving research, working with **machine learning, computer vision, embedded systems, sensors, networking, and mapping**.
- Use ROS, Tensorflow, and PyTorch to implement industry-leading **GNC algorithms** in C++ & Python from scratch.

ADDITIONAL INFORMATION:

Languages: English, Russian (Intermediate)

Eligibility: US Citizen, Eligible to work in the US for internships and full-time with no restrictions
